NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization

Abraham & Co., Inc., a Washington corporation, is registered with the Securities and Exchange Commission as a broker/dealer under the Securities Exchange Act of 1934 and with the State of Washington as a Registered Investment Advisor. The Company engages almost exclusively in fee-based investment advisory to the Company's retail clientele and to a much lesser degree, the general retail securities business. It also provides management and administrative services to a related entity. The Company's source of customers is through its sole employee who is also the Company's sole stockholder. The Company has one office located in Gig Harbor, Washington.

All securities transactions, with the exception of concessions transactions (private placements) are cleared through another broker/dealer on a fully disclosed basis. The Company does not receive or hold funds of private placement subscribers or securities of issuers, and does not hold client/customer funds or securities.

Income and Expense Recognition

The Company records income and expense on the accrual basis. Commission revenue and expense, net of clearing fees, are reflected in these financial statements on a trade date basis.

Securities Transactions

The Company has classified all marketable securities as trading. As such, all securities are carried at fair market value. Gains or losses are determined using a first-in-first-out valuation methodology.

During the year ended December 31, 2018, the Company recorded an unrealized loss of \$191 on its marketable securities and an unrealized loss of \$12,888 on its investment in an affiliate company.

Fair Value Financial Instruments

Accounting Series Codification 820, Fair Value Measurements (ASC 820) and ASC 825, Financial Instruments (ASC 825), requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. It establishes a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. It prioritizes the inputs into three levels that may be used to measure fair value:

Level 1 - Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2 - Level 2 applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability such as quoted prices for similar assets

or liabilities in active markets; quoted prices for identical assets or liabilities in markets with

Fair Value Financial Instruments (Continued)

insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3 - Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

The Company's financial instruments consist principally of cash, short-term receivables, marketable securities, accounts payable and accrued liabilities. Pursuant to ASC 820 and 825, the fair value of cash and trading marketable securities are determined based on "Level 1" inputs, which consist of quoted prices in active markets for identical assets. The recorded values of all other financial instruments approximate their current fair values because of their nature and respective maturity dates or durations.

The following table sets forth by level with the fair value hierarchy the Company's financial assets and liabilities measured at fair value on December 31, 2018:

	 _evel 1	Le	vel 2	Lev	el 3	 Total
Assets Marketable Securities	\$ 80	\$	-	\$	-	\$ 80
Investment in affiliate company	\$ 33,794	\$	-	\$	-	\$ 33,794

Recently Issued Accounting Pronouncements

The Company does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on our accompanying financial statements.

Federal Income Taxes

Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carryforwards and deferred tax assets are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.
